Remark:

The specifications valid for the machine-readable zone of travel documents (see ICAO standard 9303) applies also to the DLC; thus the script size depends likewise on the ISO standard 1831:1980.

² FA = Abbreviation for driving licence

C Confirmation about the driving authorization as a temporary substitute of the current driving licence (emergency driving licence)

If a cantonal admission authority for certain reasons (e.g. technical disturbances with DLC production) or with a differentiated withdrawal of driving licence categories is not able to issue a DLC, it gives temporarily an emergency driving licence (see sample on the next side). Because it is to be assumed foreign police and customs organs do not recognize the emergency driving licence so easily, it is recommended carrying an international driving permit during foreign travels.

In the upper half of the A4 form the EDP extract of the driving authorizations is printed. In the lower half the text (German, French, Italian and English) is inserted.
